

U.S. Polyco[™]
Adhering To Quality

USP 3120

USP 3120 is a high strength adhesive compound specifically formulated for shingle manufacturers seeking to utilize one compound for both laminating and seal tab adhesive applications. By utilizing cutting edge polymer blending technology, USP 3120 offers the logistical ease of a single component, reducing the storage space required in typical two component systems. Physical properties can be adjusted upon request.

Typical Properties

Softening Point, in °F.	205-230
Penetration @ 77 F, dmm.	35-50
Viscosity @360, Thermocel, cP.	450 - 700
