## USP Roofing Compounds

### USP 6200

USP 6200 Shingle Coating is a high performance coating compound specifically formulated for applications in the roofing shingle industry. By utilizing a unique blend of proprietary modifiers, anti-oxidant additives, and high quality asphalts, roofing customers will enjoy outstanding impact resistance and wind uplift resilience, as well as excellent granule adhesion, finished product durability, and scuff resistance.

#### Typical Properties

Softening Point, in °F.	220 - 240
Penetration @ 77°F, dmm.	25 - 40
Viscosity @400°F, Thermocel, cP.	250 - 750
